

Audiophone

Our audiophone door entry systems are recognised for high quality and are widely accepted as the nursery industry standard. Each system provides all of the components necessary to install a complete audio door entry system; including a surface lock release as standard.

This audiophone door entry system is a versatile security product for controlling access to your nursery. The telephone allows the staff to speak with them and have control of their access.

Key Features:

- Weatherproof front panel with stainless steel fascia
- High quality speech unit
- Support multiple handsets
- Ideal for single door or multiple access points

Each system comprises:

- model 801 telephone, one each station
- model SPA front door panel
- model 61 speech unit (model 51 above 10 ways)
- model 203 surface lock release
- model 212 12VAC PSU (model 225 above 10 stations) full wiring and installation instructions
